INTRODUCTION

 The 2012 First Quarter Treasury Bulletin provides fiscal and economic developments during the first three months of the year.

ECONOMIC OVERVIEW

- 2. During the first quarter of 2012, the economy remained on a recovery path, with moderate output improvements in key sectors of mining, manufacturing and energy. In agriculture, the First and Second Round Crop and Livestock Assessment Reports indicate a decline in maize output during the 2011/12 season, which affects the projected growth of 11.6% for agriculture.
- 3. Inflation was on a decline from 4.3% in January and February to 4.0% March.
- 4. With regards to first quarter public finances, monthly revenues were on an upward trend, with cumulative collections of US\$771.1 million. This was, however, far below target of US\$869.7 million, a situation which affected the implementation of various projects and programmes.

5. In the external sector, total exports at about US\$900 million by end of March 2012, continued to improve but at a much slower pace than imports at US\$1.8 billion. As a result, the trade balance remained negative.

Agriculture

Output

- 6. According to the First and Second Round Crop and Livestock Assessment Reports, a total of 1 689 609 hectares were planted with maize during the 2011/2012 cropping season compared to 2 096 034 hectares in the 2010/2011 season.
- 7. This decrease is attributed to the late onset of the rainy season as well as the dry spell that prevailed during the season.
- 8. The Table below indicates the total area put under selected crops during the 2011/2012 season.

Area Planted				
Сгор	2010/2011 (ha)			
Maize	2,096,034	1,689,609	-19.4	
Sorghum	304,693	263,911	-13.4

Sugar Beans	26,778	18,370	-31.4	
Sunflower	31,102	12,809	-58.8	

9. A notable decline in output of 33% is anticipated for maize, down from 1 451 629 tons to 968 041 tons. The Table below indicates the estimated output for selected crops.

Output				
Сгор	2010/2011 (tons)	2011/2012 (tons)	% Change

Strategic Grain Reserve

10. Cumulative grain deliveries to the Grain Marketing Board as at 29 March 2012 amounted to 208 527.5 tons of maize, 12 388.91 tons of wheat and 101.31 tons of small grains.

Tobacco Sales

- 11. As at 29 March 2012, a total of US\$128.0 million had been realised from the sale of 34.5 million kgs of tobacco at an average price of US\$3.71 per kg. This is compared to US\$86.4 million realised after the sale of 28.5 million kgs of the crop at an average price of US\$3.03 per kg during the same period in 2011.
- 12. The Table below indicates tobacco sales from the commencement of the 2011/12 Tobacco Selling Season on 15 February 2012 to 29 March 2012.

Agricultural Exports and Imports

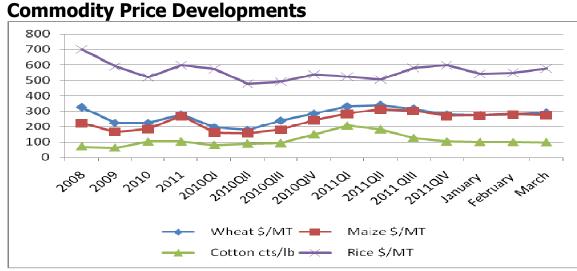

- 13. Cumulative agriculture exports for the period January to March 2012 were US\$155.6 million compared to US\$224.6 million for the same period in 2011, representing a 30.7% decrease.
- 14. On the other hand, agricultural imports for the same period stood at US\$93.7 million compared to US\$69.3 million in 2011, representing an increase of 35%.

Agricultural Commodities Price Developments

15. International agricultural commodity prices have continued to firm, mainly driven by growing demand from emerging global

markets and an increasingly unpredictable growing environment.

- 16. During the first quarter of 2012, maize prices increased from US\$273 per ton in January 2012 to US\$279.9 per ton in February 2012 before easing to US\$275.6 per ton by end of March 2012.
- 17. Similarly, wheat prices also increased from US\$275 per ton in January 2012 to US\$277 per ton in February 2012 and US\$292.3 per ton by March 2012.
- 18. Price movements for the main agricultural commodities on the international market are shown in the Graph below. Please see also Annexure 1.

Mining

Gold

19. Gold output in the first quarter of 2012 was 3 126 kgs, which is consistent with benchmarks for attaining the annual target of 15 000 kgs for 2012.

- 20. The underlying factors for increased gold production include the continued firming of international gold prices, the liberalised marketing environment and the huge investments being made in the sector.
- 21. The Table below indicates gold and other mineral output during the first quarter of 2012:

Monthly Mineral Output: Jan -March 2012

Manufacturing

- 22. During the period January March 2012, the manufacturing sector continued on a recovery path, with capacity utilisation estimated to have increased to an average of around 60%.
- 23. The increased capacity utilisation is also against the backdrop of the re-introduction of tariffs on selected products meant to create a level playing field for both domestic producers and imports.
- 24. The volume of manufacturing, which measures the performance of industries in terms of levels of production, is projected to have recovered during the first quarter of 2012 as indicated in the Table below:

Volume Of Manufacturing Indices				
	2009	2010	2011	March 2012 Proj

25. Notwithstanding this, the textile, clothing and printing industry remains under stress.

Electricity

- 26. Average production capacities of 967 MW, 956 MW, and 988 MW were realised in January, February and March. The improved production capacity in March 2012 remained much lower than the peak of about 1100 MW in 2011. This low capacity is attributed to the unresolved challenges at Hwange Thermal Power Station on Unit 1 and 4. Hence, domestic electricity supply continued to be subdued in the face of huge demand.
- 27. Monthly production trends are indicated in the Table below:

Monthly Electricity Production Trends

	Jan (MW)	Feb (MW)	Mar (MW)
Hwange	256	245	291

Bulawayo	23	20	21
Total	967	956	988

28. The Zimbabwe Electricity Supply Authority has also embarked on a nation-wide disconnection programme to reduce arrears owed by customers in order to raise financial resources to increase imports.

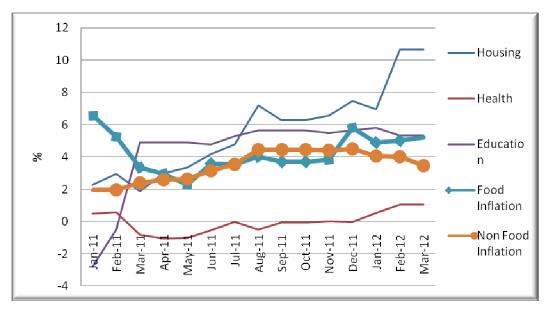

Inflation

- 29. During the first quarter, month on month inflation which was 0.5% in January, decelerated to 0.49% in February and 0.43% in March 2012.
- 30. Year-on-year inflation was constant at 4.3% in both January and February 2012, before decelerating to 4.0% in March 2012.

- 31. Month on month food inflation during the first quarter of 2012 remained constant at 0.41% in January and February, before increasing to 0.80% in March 2012.
- 32. Similarly, month on month non-food inflation also remained constant at 0.48% in January and February, before decelerating to 0.26% in March 2012.

Annual Food and Non-Food Inflation

FINANCIAL SECTOR

33. During the period under review, the economy experienced severe liquidity challenges, which had begun during the last quarter of 2011. In response, Government put in place a number of measures to address the problems.

34. Some of the measures included:

- reviewing the four monthly civil service and pension payments dates,
- closure of the offshore accounts by companies;
- increased monitoring and surveillance of the financial sector by the Reserve Bank and Treasury;
- Enhanced collaboration and sharing of information by all the financial sector regulators, including the insurance and pensions Commission and the Securities Commission.

Bank Deposits

35. Total banking sector deposits increased from US\$3.15 billion in January 2012 to US\$3.45 billion in March 2012 as shown in the Table below:

Total Banking Sector Deposits

Month	Amount (US\$)
January	3.15 billion
February	3.38 billion
March	3.45 billion

Interest on Deposits

36. Deposit rates for demand and short-term savings accounts were ranging between 0.15-5% per annum. However, longer

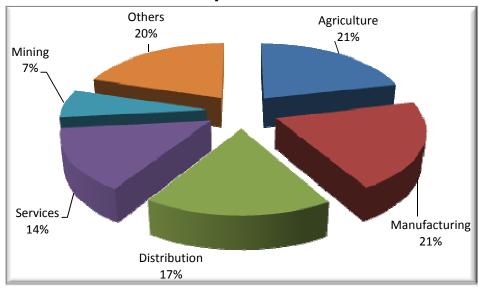

term deposits were ranging between 0.10-18% per annum against lending rates which were as high as 30%.

Type of Deposit	Interest Rate Per Annum
Demand	3-10%
Savings	0.15-10%
30 days	0.02-16%
60 days	0.05-17%
90 days	0.1-18%
180-360 days	0.15-18%

Total Bank Credit

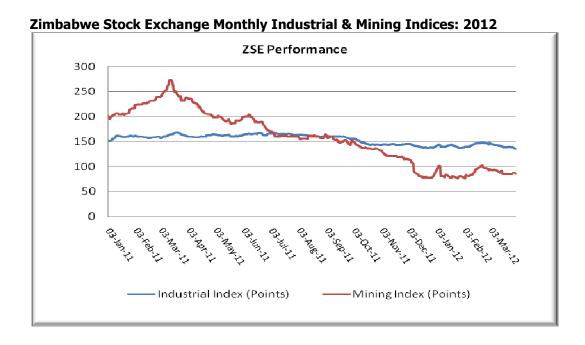

- 37. Total credit to the private sector as at the end of February 2012 was US\$2.76 billion. Credit to the private sector was mainly utilised for the payment of recurring expenditures and other asset purchases. The purchase of raw materials and other inputs accounted for 40.2% of total credit to the private sector.
- 38. Distribution of the loans to key sectors was as follows:

Loan Distribution: February 2012

Zimbabwe Stock Exchange

39. Performance of the Zimbabwe Stock Exchange during the first three months of 2012 was subdued with the few trades mainly concentrated in a few blue chip counters.

40. Reflecting this, total market capitalisation declined from US\$3.69 billion in February 2012 to US\$3.458 billion in March 2012.

Date	Turnover Value US\$	Turnover Volume	Industrial Index	Mining Index	Market Cap (US\$)

41. Overall, the 2012 first quarter performance of the Zimbabwe Stock Exchange indicates further deterioration of the local bourse compared to the same period in 2011 as as reflected below:

		January	February	March
Industrial Index	2009		58.56	67.73
	2010	156.52	140.37	142.37

EXTERNAL SECTOR

Exports

- 42. The total exports shipments as at 30 March 2012 were US\$900 million compared to US\$788 million declared during the corresponding period in 2011. This represents an increase of 14.24% in 2012 of the declared exports shipments.
- 43. On a sectoral basis, declared mineral export shipments accounted for (73.35%), followed by Tobacco (10.84%), Manufacturing (9.17%), Agriculture (6.13%), Horticulture (0.32%) and Hunting (0.19%).

Diamond Exports

- 44. Diamond exports for the first quarter of 2012 amounted to US\$214.2 million. Mbada Diamonds had the highest export shipments at US\$87.6 million, followed by Anjin which had US\$72.3 million.
- 45. The Table below shows diamond exports by mine.

Total Diamond Exports: Jan-Mar 2012

Exporter	Jan - March 2012 (US\$ mil)
Mbada Diamonds	87.6
Marange Resources	11.7
Murowa Diamonds	5.7

Diamond Mining Corporation	38.9
Total	214.2

Imports

46. In the first quarter, foreign payments for various imports amounted to US\$1.85 billion. This amount represents a 41% increase compared to US\$1.31 billion, in the same period in 2011.

47. The increase in foreign payments is attributed to the country's continued dependence on imported goods and services. Local production remains subdued and as a result, still falls short of meeting the local demand.

Imports Payments in US\$ (Jan to Mar 2012)

Month	2012	2011	Change	% Change
Jan	650,847,283	387,994,932	262,851,351	68%
Feb	563,530,165	466,233,428	97,296,737	21%
Mar	638,097,053	459,510,627	178,586,426	39%
Total	1,852,474,501	1,313,738,986	538,735,515	41%

Imports by Sector

48. In terms of foreign payments by sector, the retail and distribution sectors constituted the largest proportion of foreign payments, mainly due to the low productivity in the agriculture and manufacturing sectors. The low production in these sectors has resulted in the continued increase in foodstuffs imports and other consumables.

Foreign Imports by Sector

Expenditures

- 55. At the end of the 2012 first quarter, expenditures amounted to US\$751.4 million against planned expenditure of US\$869.9 million.
- 56. Overall disbursements were below targeted expenditures by US\$118.4 million, with capital expenditures and support to recurrent operations under-performing by US\$86.3 million and US\$68.9 million, respectively.
- 57. This reflects challenges related to revenue underperformance and the capacity constraints in line Ministries. As a result, implementation of budgeted programmes and projects was severely compromised.
- 58. First quarter sectoral performance is reported below.
